

# EASY PAPER MACHE PASTE RECIPE

## INGREDIENTS

1 cup flour

1 1/2 cups water

1/2 tbsp. salt

1/4 cup white glue (optional)

## METHOD

Mix all together, ensuring you get rid of lumps.

If you keep the paste in a covered container it will last for a week or two, thanks to the salt that keeps it from going mouldy.

The glue gives it extra strength, but I don't use it for normal paper mache as the layers do the trick. However, I do add the glue when using to stiffen material, such as my St Patrick's Day [pots of gold](#).
